Period for Reply

A SHORTENED STATUTORY PERIOD FOR REPLY IS SET TO EXPIRE 3 MONTH(S) FROM THE MAILING DATE OF THIS COMMUNICATION.

- Extensions of time may be available under the provisions of 37 CFR 1.136 (a). In no event, however, may a reply be timely filed after SIX (6) MONTHS from the mailing date of this communication.
- If the period for reply specified above is less than thirty (30) days, a reply within the statutory minimum of thirty (30) days will be considered timely.
- If NO period for reply is specified above, the maximum statutory period will apply and will expire SIX (6) MONTHS from the mailing date of this communication.
- Failure to reply within the set or extended period for reply will, by statute, cause the application to become ABANDONED (35 U.S.C. § 133).
- Any reply received by the Office later than three months after the mailing date of this communication, even if timely filed, may reduce any earned patent term adjustment. See 37 CFR 1.704(b).

Response to Amendment

Applicant's amendment dated 04/15/2002 has been received and entered.

Applicant's arguments have been considered but are moot in view of the new ground(s) of rejection.

Claim Rejections - 35 USC § 103

1. The following is a quotation of 35 U.S.C. 103(a) which forms the basis for all obviousness rejections set forth in this Office action:

(a) A patent may not be obtained though the invention is not identically disclosed or described as set forth in section 102 of this title, if the differences between the subject matter sought to be patented and the prior art are such that the subject matter as a whole would have been obvious at the time the invention was made to a person having ordinary skill in the art to which said subject matter pertains. Patentability shall not be negated by the manner in which the invention was made.

2. Claims 1-5, 7-8 and 10-24 are rejected under 35 U.S.C. 103(a) as being unpatentable over

Applicant's admitted prior art (APA), figure 11, in view of Applicant's submitted prior art, Toshimichi et al., JP 8-328002

Regarding the above claims, APA discloses an elector-optical device (figure 11) comprising:

- . A pair of substrates (30, 31);
- . An elector-optical material (39);
- . A plurality of pixels (46);
- . A lens array (L) with a plurality of convex microlenses as claimed;
- . A step portion (LB);

Art Unit: 2871

. A transparent cover (48) adhered to the lens.

The difference between the claims and APA is that the step portion being substantially equal in height to the microlenses. However, Toshimichi et al. do disclose that a step portion can be formed with the height of microlenses (h) as shown in figure 2. Therefore, it would have been obvious to one of ordinary skill in the art at the time of the invention to modify APA's elector-optical device having a step portion which is substantially equal in height to the microlenses in order to obtain sufficient mechanical strength as an opposite substrate (i.e, a lens array substrate) (see paragraph 0072).

Conclusion

3. The prior art made of record and not relied upon is considered pertinent to applicant's disclosure.

Ray et al (US 5,701,008) disclose a lens array substrate including a plurality of microlenses and a step portion (see figure 4).
